

Cataract Patient Reviews

"It has now been slightly more than two months since you performed my **cataract surgery**. In that period of time, my life has changed immeasurably for the better because of the improvements to my vision. I cannot begin to describe all the ways in which it has changed, from being able to see a raindrop to being able to read signs and billboards and menus without glasses.

When I first came to you I just figured you would remove the **cataract** with some "Windex" and I'd see better. I assumed I would still have to wear Coke bottle glasses for the rest of my life. Little did I know! Now I really do have vision that's as good as it was when I was a young man. OK so I have to wear cheaters to read, depending on the light, but that's a small price to pay for the ability to read the time on my watch in a dark room.

There have been a few people in my life whom I would consider to be angels, and you, Dr. Poland, are one of them. What you have done for me is far beyond anything that I dreamed of, and it really has changed my life for the better. From the first moment I came into your office, your staff treated me with kindness, courtesy and respect and made me feel that I was an important part of their day. I have said it before and I'll say it again: Anytime, anywhere, anyway that I can ever be of service to you in the smallest way within my abilities to do so, you have only to ask. I owe you and your terrific staff so much. No one could ever do wrong by coming in your office for help with their vision, especially with respect to **cataract surgery**. Thank you, Thank you, and Thank you."

Len F.
Atlanta, GA

"I went to my optometrist thinking she would recommend glasses. I was surprised when I was diagnosed with cataracts. I was referred to Dr. Donald Poland. He recommended cataract surgery with the ReSTOR lens implant, as that had the potential to improve my eyesight without needing glasses.

I am ecstatic about how things turned out. Colors are so vivid now. Today I am 20/20 in both eyes. I wouldn't hesitate to tell someone to go get it done. This is one of the most wonderful things that has ever happened to me. Dr. Poland and the entire staff at Georgia Eye Associates are awesome."

Marty M.
Lawrenceville, GA

"2 or 3 years ago I developed cataracts in both eyes. I am a special operations unit police officer so my eyesight is very important to me. When the cataracts started affecting my job, I decided to have the surgery. The surgery went very well, and the procedure was nearly painless.

I wouldn't hesitate to recommend premium lens implants and Dr. Gillian to anyone who needs cataract surgery. The clarity after surgery is 100% better and my vision is clearer than ever before. Even though I had to pay extra for the implant, it was well worth it. I would do it all over again."

Fredrick B.
Suwanee, GA

"After 40 years it's great not having to wear glasses anymore. I would recommend bi-focal lens implants to anyone. Dr. Gillian was great to deal with."

Charlie H.
Buckhead, GA

"I had cataract surgery with the ReSTOR bi-focal lens replacements. Right after the surgery my eyesight improved dramatically. It's wonderful not having to worry about glasses and contacts anymore. I can read the fine print on food labels and prescriptions, and I can see street signs quickly and easily. Dr. Poland was very precise. I had the utmost confidence in him as my surgeon."
